

A large hexagonal lattice of gray and blue hexagons forming a circular shape. The lattice is composed of many small hexagons, with some colored blue and others gray, arranged in a pattern that resembles a honeycomb structure. The overall shape is roughly circular, with the hexagons arranged in a way that the outer edges are irregular and jagged. The blue hexagons are scattered throughout the lattice, with some appearing in small clusters and others isolated. The gray hexagons form the background of the lattice. The entire structure is centered within the frame of the image.
